1. Operation without a PC using a compact flash (CF) card, clustering ability for flexible volume programming up to 15+ units. **See [Stand-Alone Graphic Illustrations.pdf](#).**
2. In-system programming cable optional for serial programming.

3. Programming speed varies for different devices. Contact Xeltek for more accurate data.
 4. Device count as of August 2017. Check the online Device List in the [Download Center](#) for the latest device count.
 5. Xeltek SuperPro universal programmers are equipped with 144-pin universal pin drivers to accommodate large pin count devices.
- One universal adapter accommodates all devices with the same package type.
 - High quality materials used to improve production reliability.
 - Multiple bottom adapters cause inventory nightmare.
 - Keeping track of adapter variations would cause delay in today's production environment
